

HEALTHY
COMFORTABLE
DYNAMIC

To create a more comfortable working environment

Product Concept

Bring performance to the office

It can carry more

Move faster

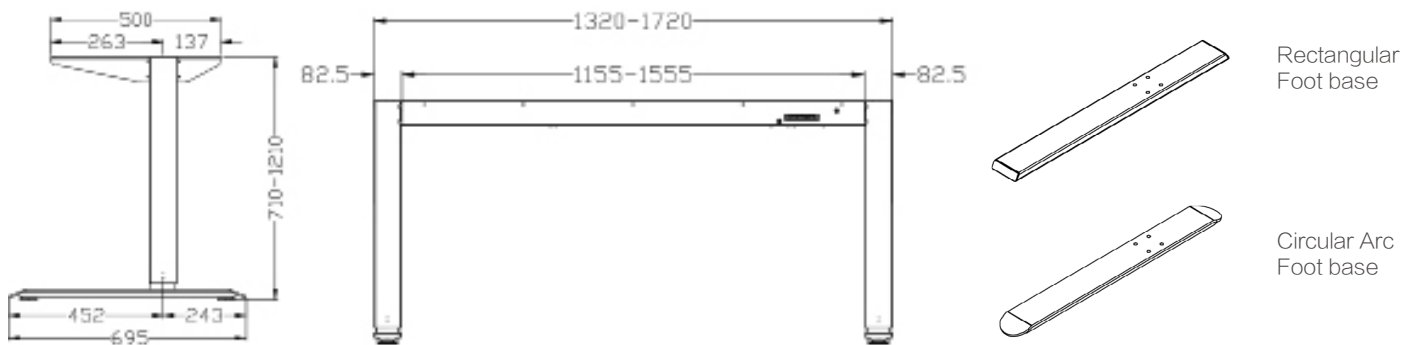

Be more environmentally friendly

Modern studies have shown that a sedentary life style is the culprit of various diseases, such as hypertension, heart disease and cervical and lumbar diseases.

Sedentary is defined by the WHO as the second main factor causing cripple.

The study also helplessly proves that a physical exercise after a long time sitting, cannot eliminate its harmful effects.

We must change the situation. Standing up, in order to move further.

■ Technical specs

- ✓ Column Size: 80x80mm or 70x70mm
- ✓ Height Range: 710-1210mm
- ✓ Stroke: 500mm
- ✓ Length Custom: 1280mm or 1480mm or 1680mm
- ✓ Length Custom Range: 1320mm-1720mm
- ✓ Foot base: Rectangular, Circular Arc

work and power

Innovation

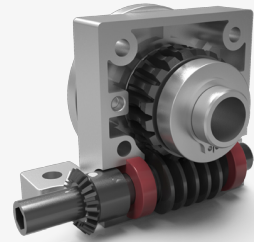

Height adjustment only by mechanical combined driven system without power supply.

Security

No power supply is the most safest guarantee

Multiple gears locking system can take 500KGS static load-bearing

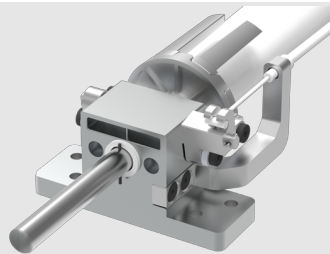

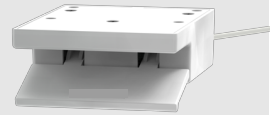

Durability

The Low speed mechanical gear box runs with very low friction, Precision Guaranteed for 10 years.

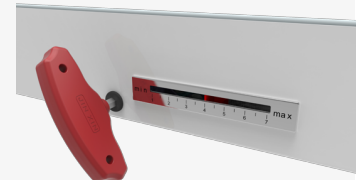

Humanization design

One switch to control open & locking

The power source is Suspending gas spring + Manganese steel torsional spring. To balance lift up and down will make you feel free and relaxed in use

Use turning wrench to add lifting force so as to meet the varying weights placed on the table.

Simple assembly frame, only divided into 5 components & only use 16 screws for assembly.
