

 **DFM**
Safe. Smart. Secured Solutions.

Our Core Values:

- **Safe** – DFM's solutions are built with top-tier security measures, ensuring peace of mind for every user.
- **Smart** – We leverage cutting-edge technology to deliver intuitive, efficient, and reliable smart locker systems.
- **Secured** – With DFM, security isn't just a feature; it's our commitment.

Problem Arise

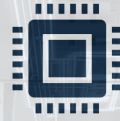

Loss of Items

Assets are easily misplaced or stolen without proper security.

Inconvenient Storage for Hot-Desking Employees

Shared desks leave employees without secure,

Inefficient Access

Traditional storage solutions lack convenience and flexibility, slowing down operations.

Lack of Accountability

With limited tracking options, it's difficult to know who accessed which items and when.

Safety Concerns

Inadequate security measures leave assets vulnerable and compromise user trust.

DFM Wired Smart Locker System

Key Features

- Biometric and Keycard Access
- Remote Monitoring and Control
- Integrated User Management Software
- Modular Design for Flexibility

Authentication Method

Facial Recognition

Passcode

RFID Card

App Integrated

Three Operation Mode

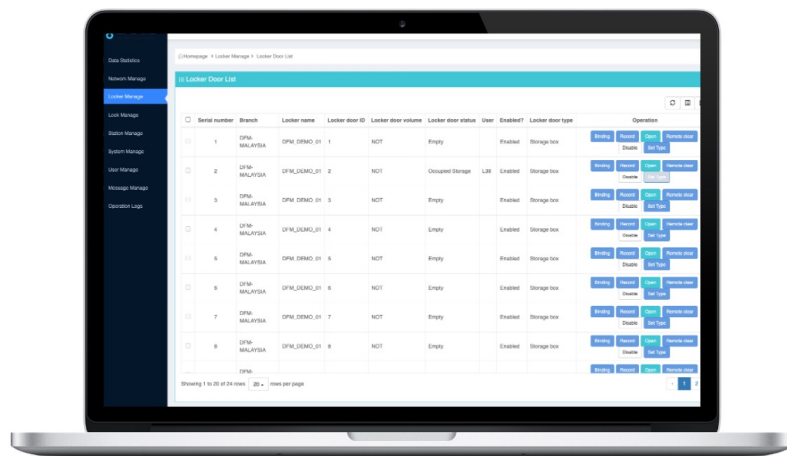

Public

Private

Reservation

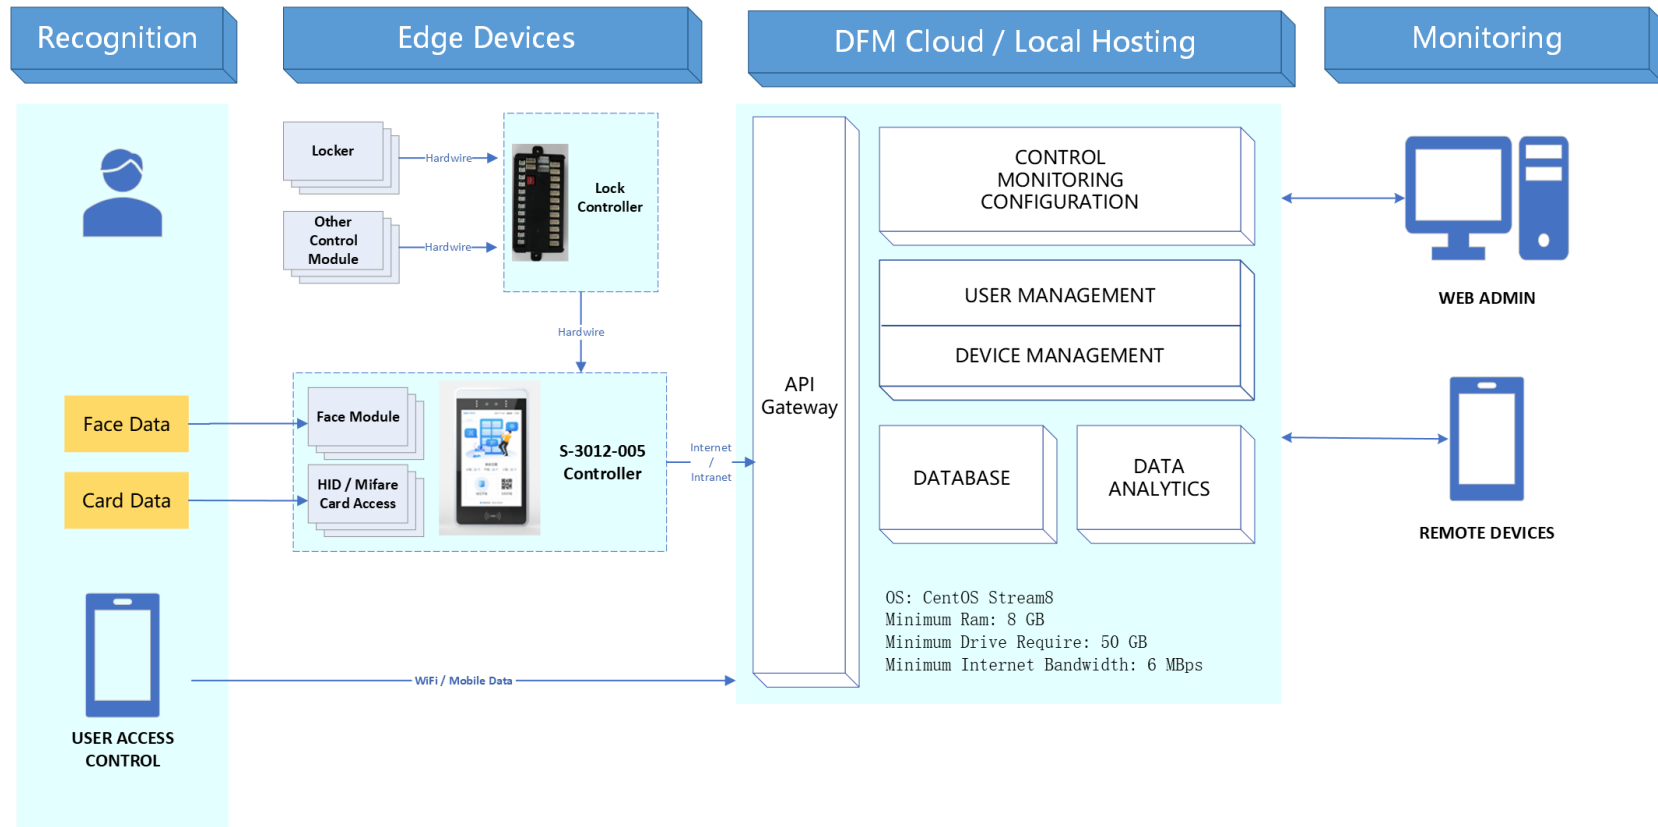

Administration Management

- **Centralized Management for HR and Admins**
Provides a single interface for admins or HR to manage the system across regions, ensuring efficiency and ease of use.
- **Comprehensive Overview**
Offers an at-a-glance view of all lockers and user activity, no matter the location or region.
- **Bulk Update Capabilities**
Enables quick updates for locker assignments and employee data, making locker allocation and reassignment seamless.
- **User-Friendly Controls**
Designed with intuitive tools that allow admin users to perform tasks easily, such as remote locking/unlocking, user access adjustments, and reporting.
- **Access Logs and Reporting**
Tracks detailed access logs for transparency, with reporting tools that aid in monitoring usage patterns and enhancing accountability.
